I would like to contribute to your organization as a full-stack web developer, leveraging my ability to develop e-commerce web applications using readily available web frameworks. With my passion for learning, I will be able to take part in empowering your team with my newly found coding expertise and can impart with my acquired knowledge in building your computer networks. My strongest asset is my work ethic and my willingness to step in when needed. I'm not afraid to take on a difficult client or do a project that nobody else wants because those are the clients and projects that teach me the most. I typically love to work outside of my job description and do whatever is asked of me. I'm not above any single task, and I take great pride in my ability to step in and adapt to any situation to get the best results for the company.

ABOUT ME

I love playing basketball. Meeting new friends, cooperating with them and sometimes leading them as their team captain has always been fun. I have also always been a persevering and determined individual. Though I started in a non-IT career path, I keep myself updated to the technologies that the developers are using by attending seminars and boot camps, and self-studying in my free time.
